MEDICO LEGAL EXPERIENCE:

Dr Amr Elsis is a Consultant in Anaesthetics and an Expert Witness. He has attended Inspire MediLaw training and is instructed by Claimants and Defendants on clinical negligence cases.

Dr Elsis has over 5 years' experience as an Expert Witness and has provided opinion on over 100 reports from anaesthesia related incidents, injection complications, post-surgery complications and issues around informed consent to name a few.

All of the reports produced by Dr Elsis are clinical negligence reports. He completes 20-30 reports per year.

He is able to conduct assessments if the case calls for it, but predominantly writes desktop reports, dealing with causation, liability and breach of duty.

Although he has received numerous witness summons, he is yet to attend Court.

CLINICAL EXPERIENCE:

Working as an Anaesthetist for over 20 years, Dr Elsis currently works at the University Hospitals Leicester alongside his private work at the Spire Hospital Leicester, Nuffield Hospital Leicester, and Spire Hospital Nottingham.

Dr Elsis has practiced anaesthesia in four diverse countries: the United Kingdom, Egypt, France, and Saudi Arabia. Fluent in three languages – English, French, and Arabic – Dr. Elsis effortlessly bridges linguistic and cultural barriers, enhancing his ability to deliver exceptional patient care.

Dr Elsis is a dedicated appraiser within the hospital setting, exemplifying a comprehensive understanding of Good Medical Practice Guidelines. He evaluates and supports his colleagues as they navigate the revalidation process, ensuring adherence to the highest standards of medical practice.

In addition, Dr Elsis spearheads a high-risk preoperative assessment clinic, specifically tailored for patients undergoing complex thoracic surgical procedures. He meticulously assesses each patient's suitability for surgery, conducts thorough risk assessments, and expertly obtains informed consent, particularly with regard to the inherent anesthesia-related risks.

Dr Elsis's commitment to professional development extends to his role as an Advanced Life Support (ALS) Instructor, accredited by the British Resuscitation Council. His dedication to enhancing medical preparedness is further evidenced by his imminent achievement in becoming a full instructor of European Paediatric Life Support, accredited by the European Resuscitation Council.

Dr Elsis boasts a commendable accreditation in the practice of Trans-Oesophageal Echocardiography (TOE), endorsed by the British Society of Echocardiography (BSE). His proficiency in this specialised skill underscores his comprehensive grasp of cardiac diagnostics and patient care.
