CURRENT ROLE:

Consultant Pain Management

Spire Liverpool Hospital

Spire Cheshire Hospital

Nuffield Health, The Grosvenor Hospital Chester

A Logan Pain Management Ltd

CASES RELATING TO:

All matters relating to pain:

- Chronic & neuropathic pain
- Adult pain relief
- Rehabilitation of pain conditions
- Fibromyalgia

MEDICO LEGAL EXPERIENCE:

Dr Andrew Logan is a Consultant in Pain Management who has acted as an Expert Witness since 1996. He has Bond Solon training and is instructed by both Claimants and Defendants on personal injury and clinical negligence cases.

While predominantly representing Claimants in the past, Dr Logan has increasingly taken on Defendant assignments, striving for equal representation in his workload.

His expertise extends to producing meticulous reports covering causation, condition and prognosis, as well as breach of duty assessments.

Dr Logan's commitment to delivering expert testimony is exemplified by his courtroom experience, including his pivotal role in a case in 2020 where his report played a decisive role in determining the outcome.

CLINICAL EXPERIENCE:

Dr Logan is a Consultant with 24 years' experience in the Countess of Chester NHS Trust, now exclusively engaged in private practice and medicolegal reporting. His expertise lies in the fields of anaesthetics, pain management, chronic and neuropathic pain, with a particular focus on adult pain relief, rehabilitation for painful conditions, and fibromyalgia.

His professional involvement encompasses the comprehensive assessment and treatment of patients with long-term pain or acute exacerbations of pain, spanning various areas such as shoulder, back, neck, neuropathic, chronic post-operative pain, and complex regional pain syndrome.

Dr Logan specialises in interventional treatments for chronic post-operative pain syndromes, as well as addressing shoulder, back, and neck pain using facet joint treatments, including radiofrequency procedures and specific techniques for sacroiliac joint pain and coccydynia.

Dr Logan is an active member of several esteemed medical organisations, including the Merseyside Pain Training Advisory Committee, The Pain Society, the North England Pain Society, and The British Medical Association. He holds the distinguished titles of Fellow of the Faculty of Pain Medicine of the Royal College of Anaesthetists and Fellow of the Royal College of Anaesthetists.

Dr Logan is renowned for his holistic approach to pain management, offering multidisciplinary pain management programs and tailored long-term treatment plans for complex chronic pain conditions that may not respond to conventional therapies. He employs various modalities of pain relief, including TSE, PEMF (pulsed electromagnetic fields), PENS (percutaneous electrical nerve stimulation), pulsed radiofrequency treatments, and advanced interventional techniques like spinal cord stimulation.

Dr Logan operates his own fully equipped unit, which is soon to receive CQC approval. He also oversees a team of professionals and collaborates with several private hospitals. While he maintains a broad scope of practice, he prefers to avoid highly specialised and serious psychological issues, considering himself a "general interventionist" with extensive experience in managing back, neck, shoulder pain, post-operative pain, and neuropathic pain syndromes.

Dr Logan is also engaged in another healthcare venture serving the NHS, acting as a shareholder and advisor.

What truly distinguishes Dr Logan is his ability to maintain a consistently high case load even after departing from the NHS, with a practice that is thriving and expanding. He manages his own facilities, conducts clinics across multiple locations, and pioneers cutting-edge pain treatments, including the use of a triple infrared laser. Notably, he operates independently, setting his fee schedule and remaining unwavering in his commitment to patient care, regardless of external pressures from insurance companies.
