CASES RELATING TO:

Personal injury and clinical negligence relating to:

- Head injury
 - Traumatic brain injury (mild, moderate, severe)
- Stroke
- Neurosurgical malpractice
- Neuro-oncology
- Paediatric neurosurgery
- Craniotomy
- Epilepsy surgery
- Meningioma surgery
- Hydrocephalus treatment
- Vascular surgery and subarachnoid haemorrhage (SAH)
- Chiari malformation decompression
- Kyphoplasty
- Cervical spine injury
- Thoracic spine injury
- Lumbar spine injury
- Spondylosis
- Stenosis of the spine
- Spinal microsurgery
- Spinal fracture
- Spinal infection
- Cauda Equina Syndrome (CES)
- Complex spinal surgery
- Disc prolapse
- Whiplash
- Soft tissue injury
- Strain injury
- Central nervous system (CNS) infection
- Peripheral nerve injury
- Endoscopic neuro surgery
- Cerebrovascular disease
- Cerebral revascularisation
- Neck injury
- Skull base surgery
- Intracerebral haemorrhage
- Spina bifida
- Discectomy
- Injuries related to bullet, blast and weapons
- Injuries relating to parachuting and air crashes
- Post-operative complications (bleeding, infection, nerve damage)

MEDICO LEGAL EXPERIENCE:

Mr Ameen is a highly experienced Consultant Neurosurgeon with over 25 years of dedicated medico-legal practice in the United Kingdom, underpinned by more than 38 years of clinical neurosurgical experience.

He has extensive expertise in the preparation of medico-legal reports for a broad range of instructing parties, including private solicitors, the Crown Prosecution Service (CPS), civil and criminal courts. His work has also been commissioned by multiple agencies affiliated with the Association of Medical Reporting Organisations (AMRO).

Recognised as a First Tier Expert by the Association of Personal Injury Lawyers (APIL), Mr Ameen has undertaken formal training in medico-legal report writing, clinical negligence, and courtroom skills, ensuring a high standard of expert evidence.

His medico-legal practice encompasses a wide spectrum of complex neurosurgical conditions, with particular emphasis on head and spinal injuries, traumatic brain injury, degenerative spinal disorders, and clinical negligence claims. He is experienced in cases arising from road traffic accidents, workplace injuries, and surgical complications.

He attends Court as an Expert Witness around three to four times per year. His primary clinical interests include head and spinal injuries (including whiplash), stroke, brain tumours, degenerative cervical and lumbar spine disease, cauda equina syndrome, and clinical negligence claims.

CLINICAL EXPERIENCE:

Mr Ameen is a senior Consultant Neurosurgeon who has international and UK based clinical experience, specialising in the diagnosis, surgical treatment and rehabilitation of cranial and spinal neurosurgical conditions. His career spans multiple senior appointments in the UK, Middle East and Iraq, where he has led neurosurgical units and managed complex caseloads in both elective and emergency settings.

He began his neurosurgical career at Central Middlesex Hospital, London (1977–1980) as a Resident Registrar, receiving broad based training in acute and elective neurosurgery under the mentorship of Mr R.D. Illingworth and Mr M. Rice-Edwards. From 1980 to 1992, he co-founded and led a 20 bed neurosurgical unit at Basrah Teaching Hospital and Medical School, providing neurosurgical care to a population of over four million during the Iraq-Iran war, where he gained extensive experience in neurotrauma, including penetrating head and spinal injuries.

Between 1992 and 1994, he served as Consultant Neurosurgeon and Associate Professor at Jordan University Hospital in Amman, a 24-bed dedicated neurosurgical unit. He was also an examiner for the Jordanian Board of Neurosurgery.

From 1998 to 2006, Dr Ameen held a substantive post at the Royal Free Hospital, London first as a Locum Consultant Neurosurgeon and then as a Staff Grade and Associate Specialist. He operated independently alongside three consultants, managing his own outpatient clinics and theatre lists. His audited performance matched consultant level outcomes in terms of morbidity and mortality.

From 2006 to 2009, he worked as a Senior Consultant Neurosurgeon at Hamad General Hospital in Doha, Qatar a modern, fully equipped neurosurgical centre. There he led three theatre sessions and two outpatient clinics per week and participated in multidisciplinary neuroradiology and neuropathology meetings. The hospital served the national population, with a high volume of spinal injuries and trauma-related cases, due to rapid urban development.

From 2009 to 2014, Dr Ameen was appointed as a Consultant Neurosurgeon in Birmingham, initially with a general neurosurgical remit before specialising in spinal surgery. He performed three operative sessions per week, managed spinal inpatient care and participated in the on-call rota. He regularly attended spinal multidisciplinary team (MDT) meetings and kept up to date through continuous professional development, attending eight advanced spinal surgery workshops focusing on instrumented fusion and degenerative spine conditions.

His experience also included rehabilitation of complex spinal disorders, drawing on his earlier work at Sketchley Hall Rehabilitation Centre, Leicestershire.

His broad clinical experience across war zones, academic hospitals and leading NHS and international institutions gives him unique insight into complex neurosurgical conditions and their management, making him a highly credible expert for both clinical and legal assessments.
